

ENGLISH SECOND TERM EXAM

Full name:.....**level:** 3ème

Text: CORONAVIRUS

Coronavirus is a newly discovered virus. It causes a disease called covid-19. In some parts of the world, **it** has made lots of people sick.

A lot of symptoms are similar to the flu. You may have dry and itchy cough, fever, lots of sneezing and even hard to breath. Most of people who have been sick with this corona virus have had a mild case. It means **they** will not feel the disease. But, for people who are much older or who already have health problems are more likely to get sicker with coronavirus.

If anyone gets sick and feels like **he** has coronavirus, he can immediately call their doctor and get help. If there is something we are not sure about the information, if you are confused or worried about, don't be afraid to ask someone we trust.

Here are some things you can do to protect yourself, family, and friends from getting sick with coronavirus:

- Wash your hands often using soap and water or use hand sanitizer.
- Sneeze into your elbow. It is believed that coronavirus spreads through little liquid from our lungs. If you sneeze into your elbow, you can prevent germs from going far into the air.
- Wear a mask when you go to the grocery store and stand stay six feet apart while waiting in line.
- Avoid touching your face. Don't touch your nose or your mouth. Don't rub your eyes. They are the places where the virus enters our bodies.

Don't forget, there are a lot of helpers who are working to protect us from the virus. We can take a part by keeping our health and stay safe at home to stop the virus spread to others.
